

Based on the Apex Retail Group metrics and the characteristics of the three proposed branches, the weighted evaluation is:

Solution	Criterion	Weight	Score (1-10)	Weighted Score
Branch A – E-Commerce & Logistics Overhaul	ROI	30%	8	2.40
	Low Execution Risk	20%	6	1.20
	Implementation Speed	20%	7	1.40
	Resource Alignment	30%	9	2.70
	Total	100%		7.70
Branch B – Retail Footprint Downsizing	ROI	30%	7	2.10
	Low Execution Risk	20%	5	1.00
	Implementation Speed	20%	8	1.60
	Resource Alignment	30%	7	2.10
	Total	100%		6.80
Branch C – Hybrid B2B Licensing	ROI	30%	9	2.70
	Low Execution Risk	20%	7	1.40
	Implementation Speed	20%	5	1.00
	Resource Alignment	30%	8	2.40
	Total	100%		7.50

Result

Rank	Solution	Weighted Score
1	Branch A – E-Commerce & Logistics Overhaul	7.70 / 10
2	Branch C – Hybrid B2B Licensing	7.50 / 10
3	Branch B – Retail Footprint Downsizing	6.80 / 10

Winner: Branch A – E-Commerce & Logistics Overhaul, with a weighted score of **7.70/10**. It scores particularly strongly on resource alignment because it directly addresses Apex's low e-commerce conversion, high cart abandonment, inventory bottlenecks, and logistics inefficiencies.

I can also create an image explaining this decision matrix and logical flow.
